

NET ZERO EMISSION COMMITMENT

Sebagai langkah nyata mewujudkan aspirasi PT Pertamina Geothermal Energy Tbk menjadi *"World Class Green Energy Company with Largest Geothermal Capacity Globally"* guna mendukung dan berpartisipasi dalam agenda dekarbonisasi nasional dan khususnya dalam mencapai Target *Net Zero Emission*, serta sejalan dengan Kebijakan Keberlanjutan dan Fokus Keberlanjutan perusahaan, maka PT Pertamina Geothermal Energy Tbk berkomitmen untuk menerapkan Strategy ESG Perusahaan khususnya dalam mendorong pencapaian target *Net Zero Emission* pada tahun 2060 atau lebih cepat melalui:

CARBON NEUTRAL OPERATION

Berkomitmen mencapai *carbon neutral operation* dengan meningkatkan efisiensi energi, optimalisasi energi terbarukan, serta implementasi inisiatif dekarbonisasi berbasis teknologi

STAKEHOLDER MANAGEMENT

Melakukan stakeholder engagement & communication secara aktif untuk bersinergi dalam pencapaian target *Net Zero Emission*

PEMBIAYAAN HIJAU

Optimalisasi pemanfaatan pendanaan eksternal melalui *Green Financing* untuk mengakselerasi *new green business development* serta mendorong pelaksanaan inisiatif dekarbonisasi

KAPABILITAS ORGANISASI DAN SDM

Mengembangkan dan memperkuat organisasi untuk dapat mendorong upaya dekarbonisasi dan peningkatan *new green business* di PGE

INOVASI MODEL BISNIS

Implementasi model bisnis yang agile, kooperatif, dan adaptif untuk mendukung dekarbonisasi sektor geothermal melalui kemitraan global yang terbuka dan setara, untuk meningkatkan nilai tambah dan efisiensi

IMPLEMENTASI PROGRAM DEKARBONISASI UTAMA

Melaksanakan program dekarbonisasi yang tertuang dalam project charter dalam rangka dengan pencapaian *Net Zero Emission*, dengan strategi implementasi dan monitoring secara berkelanjutan

TEKNOLOGI HIJAU DAN INOVASI DIGITAL

Akselerasi penggunaan energi hijau, teknologi terbaru, dan digitalisasi untuk mendorong efisiensi, efektivitas, serta daya saing untuk dekarbonisasi dan pengembangan *green business*

DEKARBONIZATION CATALYST

Berkomitmen untuk meningkatkan kapasitas terpasang geothermal dan produk turunan dengan mempertimbangkan pemanfaatan teknologi baru yang mendorong dekarbonisasi

ORIENTASI GREEN STRATEGY

Integrasi pilar strategis perusahaan ke dalam sistem manajemen kinerja dan manajemen resiko perubahan iklim, serta melakukan implementasi *Carbon Accounting* mencakup penerapan IFRS S1-S2 dan *Climate Scenario Analysis*

NET ZERO EMISSION COMMITMENT

As a concrete step to realize PT Pertamina Geothermal Energy Tbk's aspiration to become a "World Class Green Energy Company with Largest Geothermal Capacity Globally" in support of and participation in the national decarbonization agenda, particularly in achieving the Net Zero Emission Target, and in alignment with the Company's Sustainability Policy and Sustainability Focus, PT Pertamina Geothermal Energy Tbk commits to implementing the Company's ESG Strategy, especially in achieving the Net Zero Emission target by 2060 or sooner through:

CARBON NEUTRAL OPERATION

Committed to achieving carbon neutral operations by improving energy efficiency, optimizing renewable energy, and implementing technology based decarbonization initiatives.

STAKEHOLDER MANAGEMENT

Conducting active stakeholder engagement & communication to synergize in achieving the Net Zero Emission target.

GREEN FINANCING

Optimizing the utilization of external funding through Green Financing to accelerate new green business development and drive the implementation of decarbonization initiatives.

ORGANIZATIONAL CAPABILITY & HUMAN RESOURCES

Developing and strengthening the organization to drive decarbonization efforts and new green business development at PGE.

BUSINESS MODEL INNOVATION

Implementing agile, cooperative, and adaptive business models to support decarbonization of the geothermal sector through open and equal global partnerships, to increase added value and efficiency.

MAIN DECARBONIZATION PROGRAM IMPLEMENTATION

Implementing decarbonization programs outlined in the project charter to achieve Net Zero Emission, with continuous implementation strategy and monitoring.

GREEN TECHNOLOGY & DIGITAL INNOVATION

Accelerating the use of green energy, renewable technology, and digitalization to drive efficiency, effectiveness, and competitiveness, as well as decarbonization and green business development.

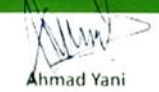

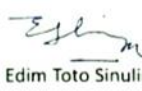

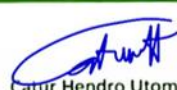

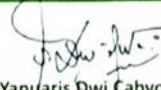

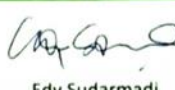

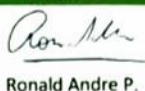

DECARBONIZATION CATALYST

Committed to increasing installed geothermal capacity and derivative products by considering the utilization of new technologies that drive decarbonization.

GREEN STRATEGY ORIENTATION

Integration of the company's strategic pillars into the performance management system and climate change risk management, as well as implementing Carbon Accounting including IFRS S1-S2 application and Climate Scenario Analysis.
